

AI Interview Readiness Analyzer

Interview Performance Report

Interview Date	06 July 2026
Assessment Type	AI Mock Interview
Generated By	AI Interview Readiness Analyzer

Executive Summary

Metric	Result
Overall Readiness Score	67.76%
Prediction	Needs Improvement

Camera Behaviour Analysis

Metric	Score
Eye Contact	83.0
Posture	82.0
Head Stability	26.0

Interview Analysis

Question 1

Interview Question	
How do you handle deployment rollbacks in a CI/CD pipeline, and what strategies can you use to minimize downtime?	
Transcript	
Metric	Score
Fluency	100
Correctness	42
AI Feedback	
The candidate provided some relevant strategies for handling deployment rollbacks, but lacked technical accuracy	

Question 2

Interview Question	
What is normalization?	
Transcript	
Normalization is the process of breaking down the data into tables containing the first normal second normal third n	
Metric	Score
Fluency	100
Correctness	10
AI Feedback	
The candidate failed to provide a clear and concise explanation of normalization, instead listing forms without descr	

Question 3

Interview Question	
What strategies would you employ to ensure the security and integrity of sensitive data stored in a GitHub repository?	

Transcript	
APS keys should be kept in a .tnb file and should not be shared on GitHub. APS keys should be kept in a .tnb file a	
Metric	Score
Fluency	100
Correctness	20
AI Feedback	
The candidate's answer lacks technical accuracy, completeness, and relevance, failing to provide a comprehensive	

Question 4

Interview Question	
What is the difference between Django's built-in user authentication system and a custom authentication system, a	
Transcript	
Metric	Score
Fluency	100
Correctness	40
AI Feedback	
The candidate provided a good start, but their answer lacked depth and failed to cover key aspects of when to use	

Question 5

Interview Question	
How would you implement a custom PyTorch module using PyTorch's nn.Module class, including forward and back	
Transcript	
Metric	Score
Fluency	100
Correctness	60

AI Feedback

The candidate's answer is mostly correct, but lacks completeness and relevance to the specific requirements of the

Question 6

Interview Question

Difference between merge and rebase.

Transcript

... ..

Metric	Score
Fluency	75
Correctness	36

AI Feedback

The candidate provided a good start, but failed to provide a detailed explanation of the differences between merge

Question 7

Interview Question

Why should we hire you?

Transcript

I have the particular skills that are required for this particular job. It's a reason why I'm showing you how.

Metric	Score
Fluency	100
Correctness	20

AI Feedback

The candidate's answer lacks technical accuracy, completeness, and relevance, failing to demonstrate a clear unde

Question 8

Interview Question	
How do you implement a singleton pattern in JavaScript, and what are the benefits of using it?	
Transcript	
Metric	Score
Fluency	100
Correctness	60
AI Feedback	
The candidate provided a good start, but their implementation and explanation of the singleton pattern were incomple	

Question 9

Interview Question	
What is the difference between PyTorch's autograd and manual gradient computation, and when would you use each?	
Transcript	
Metric	Score
Fluency	100
Correctness	60
AI Feedback	
The candidate provided a good overview of the differences between autograd and manual gradient computation, but	

Question 10

Interview Question	
How do you implement a linked list in C, and what are the trade-offs between a singly-linked list and a doubly-linked list?	
Transcript	

Metric	Score
Fluency	100
Correctness	60

AI Feedback
The candidate provided a good start on implementing a linked list in C, but their explanation of the trade-offs between

AI Interview Summary

Strengths
✓ Basic understanding of interview concepts.
✓ Shows potential with practice.

Areas for Improvement
• Improve communication fluency.
• Increase technical correctness.
• Maintain better posture.
• Improve confidence while answering.

Overall Verdict

Based on the complete interview assessment including speech analysis, camera behaviour analysis and the Machine Learning readiness prediction, the candidate achieved an overall readiness score of **67.76%**. Current Interview Status: **Needs Improvement** Continue practicing consistently to further improve technical knowledge, communication skills and interview confidence.
